MEMORANDUM

TO: Members of Council

THROUGH: Vincenti Pedro, Sr., Governor

FR: Ron J. Solimon, Legal Assistant

RE: Reclamation Discussions

DA: February 6, 1984

Confidential Claim Retracted

Authorized by: SK

Date: 4/25/13

Attached hereto please find a copy of "Alternative E - Laguna Proposal" which has evolved from past Council discussions on the Environmental Impact Statement (EIS). This document comprises our position with the exception of the one engineering standard that I have identified with an asterisk (Note: It hasn't been presented to Council for their adoption). This standard will be presented to you tomorrow by Allen Ries who is a mining engineer employed by the Council of Energy Resource Tribes (CERT) on a consulting contract.

I have developed an agenda with Mike Pool, EIS Task Force Leader, which will include the following subject areas:

- o HYDROLOGY
- o MINE-SITE
- o BLAST DAMAGE
- o MINERAL RESOURCES
- o REVEGITATION METHODS
- o SURFACE FACILITIES AND STRUCTURES
- o UNDERGROUND MODIFICATIONS
- o SITE STABILITY AND DRAINAGE
- o MONITORING
- o SECURITY AND COMPLIANCE
- o RECLAMATION COMPLETION
- o RECLAMATION COSTS

BLM and BIA presenters and representatives will be in attendance along with CERT employees who have worked on the reclamation project. I'm looking forward to a good discussion.
